Microsoft Office® Products Group Deployment

Business Situation

The Microsoft Office team handles an enormous amount of data each day. Consequently, it needs a high-performing storage solution that deduplicates, provides no-fail backup, and is easy enough to use that staff time can be spent on advancing their product.

Solution

The Microsoft Office team chose Commvault software for its backup and recovery solution. Commvault is the first enterprise storage management solution built from the ground up on Microsoft Windows™ architecture.

"We wanted a data management solution that was not too complex, but it needed to meet a lot of different criteria. CommVault provides us with the peace of mind that the process can be managed end-to-end."

Shawn McCoy,
Principal Operations Lead,
Microsoft Office product development group

Commvault extends the value of Microsoft solutions

Azure™

Organize your resources
