

Unlock Amazon S3 to Azure Blob Storage with Zenko Connect for Azure

AVAILABLE FOR FREE FROM AZURE MARKETPLACE

Store your data in Azure native format with Zenko Connect for Azure

As a subset of [Scality Zenko](#), Zenko Connect for Azure provides a stepping stone into a multi-cloud world by enabling customers to immediately consume Azure Blob Storage with their proven Amazon S3 applications without any application modifications.

Zenko Connect runs as a stateless container within a customer's Azure subscription, providing scale-out performance and advanced security innovations as data never leaves the customer's subscription. Zenko Connect stores data in Azure native format so customers can access that data with any Azure cloud service such as Azure Machine Learning or Microsoft Power BI toolsets.

Benefits

- Provides flexibility in cloud storage while reducing application development costs
- Maintains security because your data never leaves your Azure subscription
- API compatibility, upgrades, patches automatically managed
- Allows data to be accessed by any Azure cloud service such as Cortana Analytics, PowerBI, or Azure Machine Learning toolsets

Features

- Translation layer between any Amazon S3-compatible app and Azure Blob Storage
- Immediately leverage Azure Blob Storage without application modifications
- Data is stored in Azure Blob Storage native format
- Purchase and deploy through [Azure Marketplace](#)

It's Easy to Get Started

Zenko Connect for Azure Blob Storage lets users consume Azure Blob Storage with their proven Amazon S3 applications. Click below to visit the Azure Marketplace and leverage Azure Blob Storage without application modifications.
